

Career Opportunity

POOL MECHANIC

**It's hot - hard work.
And we won't try to convince you otherwise.**

As a Pool Mechanic we expect you to have previous experience and knowledge within the pool service industry (pvc work, basic electrical, piping, hydraulics) - but more importantly you've got to have an open mind, and be willing to do things differently.

The upside is real and rewarding for the right person. The position requires someone who prefers to work outside and is fueled by freedom, family and challenge. If you're the kind of individual who enjoys being active and appreciates the importance of having a teammate's back each and every day - you're speaking our language.

As an employer, we will never play lip service to the importance of loyalty; waste your potential or miss an opportunity to make someone's day. We provide ongoing training to help you hone your skills. The more important part of the job (the stuff that can't be taught) requires that you actually care about helping people; get pumped just thinking about a hard day's work - and that you're willing to go the extra when a teammate's up against it.

The work is demanding but the compensation is the best in the industry. Some of the benefits beyond your salary include profit sharing, monthly bonuses, vacation time, life and health insurance, and a matching 401k. Plus we provide the tools, gas, branded company truck and uniform - with ongoing training and support.

If you're still reading this ad, and believe we'd be a good fit together - simply **go to the career section** of our website at PoolTroopers.com (if you're not already there) and **follow the online application steps as outlined.**

We look forward to hearing from you.
